Risk warning

Forex trading and leveraged trading involve significant risk and can cause your capital to disappear. Be aware of the risks. It is suggested that you enter the market with capital that will not harm you if it is lost. Using leveraged trading is not suitable for every trader. Non-leveraged trading, like stock trading, also involves risk, because the stock value is also constantly fluctuating and can cause you to lose part of your capital. Good past performance cannot guarantee your future success. Before starting trading, make decisions based on your experience and goals and consult with financial experts if needed. It is the responsibility of the users to make sure that according to the laws of their country of residence, they can use the services of Aron Group Broker or not. Please read the agreement form along with the broker's general rules.
